

NEXt generation Emergency Services

NEXES Results

NEXES System and Apps

NEXES System and Apps bring total conversation communications to enhance emergency services' situational awareness and interoperability and an ethically responsible end-to-end connection to first responders and citizens.

NEXES Testbed

NEXES supports the testing and validation of the NEXES System and Apps, as well as of all IP-compliant emergency systems, thus contributing to the European standardisation effort towards next generation emergency products and services.

NEXES Recommendations

NEXES offers a roadmap and guidelines to assist emergency services in the transition path towards the next generation emergency services, considering cost-benefit analysis, sustainability models and potential impact to maximise benefits.

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 653337.
